

CICO® GUNCLEANER GC 55

HIGH-PERFORMANCE CLEANER
FOR SHORT AND LONG GUNS

Product benefits

- is used to clean metal, plastic and lacquered wooden surfaces of weapons and silencers
- removes traces of smoke, oil, grease and black powder residues, old deposits, blood and traces of insects
- is sprayed on, wets optimally and - depending on the degree of soiling - takes effect after a short exposure time
- after treatment, wipe off dirt and liquid with a cleaning cloth without leaving any residue
- economical to use
- odorless
- non-aggressive
- biodegradable ingredients

Description

CICO® GUNCLEANER GC 55 is an alkaline high-performance cleaner for short and long guns, also for silencers.

It quickly and reliably removes smoke and black powder residues, oil and grease deposits, old resin deposits and deposits of blood and insects.

The application time of **CICO® GUNCLEANER GC 55** is short. It is sprayed on, wets optimally and - depending on the degree of soiling - takes effect after a short exposure time. A short, residue-free wiping off of dirt and liquid with a cleaning cloth is then sufficient.

CICO® GUNCLEANER GC 55 is suitable for metal, plastic and painted wooden surfaces. It is not aggressive, but cleans and degreases reliably and easily and is odorless.

Application information

Further treatment of the cleaned gun is carried out with **CICO® GUNSPRAY GS 77**, which optimally cares for, reliably preserves and protects all surfaces.

CICO® GUNCLEANER GC 55 is available in 500 ml spray bottles.

Attention

Do not mix with other cleaners!

Keep the spray bottle out of the reach of children. Protect it from heating and damage. Only dispose of when completely empty.

Technical specifications

Substance name	CICO® GUNCLEANER GC 55
Color	colourless
Density (at 20°C)	1.02 g/cm ³
Boiling temperature	100°C
pH	9
Dynamic viscosity (at 20°C)	<30 mPa·s
Transport	no dangerous goods
Storage stability	at least 2 years
